

## E-ZEE WEBLON

Article Description	Embroidery Backing
Composition	100% polyamid
Harmonised Tarif Number	56031290
Weight in g per m <sup>2</sup> (± 5%)	white: 44g, black: 34g
Make Up Available	Pre-cuts approx. 20 x 20cm* x 250 pieces  * Slight variations due to production processes are possible  Roll approx. 50cm x 45m
Color	white and black
How to remove	cut away
Main areas of application	Embroidery stabilizer The pre-cuts are applicable for round frames to size 15

### Features

- WEBLON is an extremely stable cut-away backing material with higher than normal temperature and chemical resistance, suitable for use on all types of materials.
- The woven structure of WEBLON prevents the backing from sliding on the fabric.
- WEBLON is extremely soft, light-weight and cut-away and thus cannot be seen through fine fabric.
- The melting point of WEBLON is approx. 260°C. WEBLON is therefore the best choice as a long-lasting embroidery stabilizer for hard-wearing garments.
- The high tensile strength of WEBLON provides extra stability for fabrics during and after embroidery, even after multiple normal and industrial washes.
- WEBLON is also suited to stabilize light-weight to middle-weight fabrics as well as knit or stretch fabrics. It makes embroidery designs cleaner and is excellent for Jersey and Polo-Piqué.

### Recommendations for care

As part of a continuous improvement programme, Madeira reserves the right to alter the specifications or modify the appearance of products without notice. Information and technical data in this document are guidelines and not guaranteed characteristics. Small variations due to production processes are possible.
